bert cosine similarities to syn_blorked_ext target group tokens @ epoch 0/multiple (best mean)
min epochs: 100, max epochs: 260, patience: 30 (Δ=0)
tuning: newverb transitive perf ext seed0
masking: always, with punctuation, mask args, lr=multiple
KL loss × multiple (multiple datasets, masking: multiple, multiple ex/step), multiple unfreezing, args group: multiple

Mean cosine similarity of BLORKED to BLORKED targets: 0.0607 (±0.0015, n=323)
Mean cosine similarity of BLORKED to anti-BLORKED targets: 0.0544 (±0.0017, n=323)

bert cosine similarities to syn_blorked_ext target group tokens @ epoch multiple/multiple (best mean)
min epochs: 100, max epochs: 260, patience: 30 (Δ=0)
tuning: newverb transitive perf ext seed0
masking: always, with punctuation, mask args, lr=multiple
KL loss × multiple (multiple datasets, masking: multiple, multiple ex/step), multiple unfreezing, args group: multiple

Mean cosine similarity of BLORKED to BLORKED targets: 0.0830 (±0.0019, n=323)
Mean cosine similarity of BLORKED to anti-BLORKED targets: 0.0762 (±0.0022, n=323)

roberta cosine similarities to syn_blorked_ext target group tokens @ epoch 0/multiple (best mean)
min epochs: 100, max epochs: 260, patience: 30 (Δ=0)
tuning: newverb transitive perf ext seed0
masking: always, with punctuation, mask args, lr=multiple
KL loss × multiple (multiple datasets, masking: multiple, multiple ex/step), multiple unfreezing, args group: multiple

Mean cosine similarity of BLORKED to BLORKED targets: 0.0072 (±0.0025, n=32)
Mean cosine similarity of BLORKED to anti-BLORKED targets: 0.0036 (±0.0022, n=32)

roberta cosine similarities to syn_blorked_ext target group tokens @ epoch multiple/multiple (best mean)
min epochs: 100, max epochs: 260, patience: 30 (Δ=0)
tuning: newverb transitive perf ext seed0
masking: always, with punctuation, mask args, lr=multiple
KL loss × multiple (multiple datasets, masking: multiple, multiple ex/step), multiple unfreezing, args group: multiple

Mean cosine similarity of BLORKED to BLORKED targets: 0.0321 (±0.0059, n=32)
Mean cosine similarity of BLORKED to anti-BLORKED targets: 0.0283 (±0.0062, n=32)

bert cosine similarities to syn_blorked_ext target group tokens @ epoch 0/multiple (best mean)
min epochs: 100, max epochs: 260, patience: 30 (Δ=0)
tuning: newverb transitive perf ext seed0
masking: always, with punctuation, mask args, lr=multiple
KL loss × multiple (multiple datasets, masking: multiple, multiple ex/step), multiple unfreezing, args group: multiple
correction: all_but_the_top (n=3.0)

Mean cosine similarity of BLORKED to BLORKED targets: 0.0010 (±0.0009, n=323)
Mean cosine similarity of BLORKED to anti-BLORKED targets: 0.0015 (±0.0009, n=323)

bert cosine similarities to syn_blorked_ext target group tokens @ epoch multiple/multiple (best mean)
min epochs: 100, max epochs: 260, patience: 30 (Δ=0)
tuning: newverb transitive perf ext seed0
masking: always, with punctuation, mask args, lr=multiple
KL loss × multiple (multiple datasets, masking: multiple, multiple ex/step), multiple unfreezing, args group: multiple
correction: all_but_the_top (n=3.0)

Mean cosine similarity of BLORKED to BLORKED targets: 0.0265 (±0.0017, n=323)
Mean cosine similarity of BLORKED to anti-BLORKED targets: 0.0256 (±0.0018, n=323)

roberta cosine similarities to syn_blorked_ext target group tokens @ epoch 0/multiple (best mean)
min epochs: 100, max epochs: 260, patience: 30 (Δ=0)
tuning: newverb transitive perf ext seed0
masking: always, with punctuation, mask args, lr=multiple
KL loss × multiple (multiple datasets, masking: multiple, multiple ex/step), multiple unfreezing, args group: multiple
correction: all_but_the_top (n=3.0)

Mean cosine similarity of BLORKED to BLORKED targets: 0.0099 (±0.0024, n=32)
Mean cosine similarity of BLORKED to anti-BLORKED targets: 0.0080 (±0.0028, n=32)

roberta cosine similarities to syn_blorked_ext target group tokens @ epoch multiple/multiple (best mean)
min epochs: 100, max epochs: 260, patience: 30 (Δ=0)
tuning: newverb transitive perf ext seed0
masking: always, with punctuation, mask args, lr=multiple
KL loss × multiple (multiple datasets, masking: multiple, multiple ex/step), multiple unfreezing, args group: multiple
correction: all_but_the_top (n=3.0)

Mean cosine similarity of BLORKED to BLORKED targets: 0.0332 (±0.0050, n=32)
Mean cosine similarity of BLORKED to anti-BLORKED targets: 0.0307 (±0.0056, n=32)
